Professional Summary

University professor and full stack developer with 12+ years of teaching experience and 8+ years in software development. I apply engineering and mathematics to build digital products and learning experiences. I work on APIs, front-ends and automation, teach Web Architecture, Programming and Databases, and support IT projects at the Innovation and Modernization Unit (NIM) of the Minas Gerais State Administrative City.

Technical Skills

- **Frontend:** React, TypeScript, Tailwind CSS
- **Backend:** Node.js, Python, Django / Django Ninja, Spring Boot, REST APIs
- **Mobile:** React Native, Android
- **Data & AI:** SQL, Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, OpenAI and Gemini APIs
- **DevOps:** Docker, Git, CI/CD, Linux, Nginx
- **Project Management:** Traditional methods (PMI, PMBOK) and agile methods (Scrum, Kanban)

Professional Experience

Higher Education Professor (Practice)

Aug 2024 – Dec 2025

Centro Universitário Newton Paiva

Courses on Databases and Web Architecture.

Android Application Developer (Freelance)

Jan 2024 – Feb 2024

Various projects

- Developed an Android application for managing healthcare services, from concept to publication.
- Implemented database-integrated features, prioritizing performance, security and user experience.
- Performed testing, validation and documentation, ensuring stability and technical quality.

Author Professor (Backend II with Databases)

2023 – 2024

Vitru Brasil Empreendimentos

Teaching and authoring course material on backend programming.

Web Systems Developer (Freelance)

Jan 2023 – Dec 2023

Various projects

- Designed, built and deployed complete web systems for clients across several industries, covering the whole software life cycle.
- Used Python, Java, SQL and modern web architecture to create scalable, secure, high-performance solutions.
- Built integrations between APIs, legacy systems and databases, automating processes and ensuring data integrity.
- Automated operational workflows, reducing manual work and increasing client productivity.
- Applied agile methods, Git version control and software engineering best practices, delivering on time.

Professor / IT Tutor

Feb 2022 – Feb 2025

UNIASSELVI

Internet Systems, Systems Analysis and Development, Financial Management and Mathematics programs.

Professor of Statistics, Financial Mathematics and Innovation

2019 – 2020

FADENORTE

Statistics, Financial Mathematics, Capstone Projects, Innovation and Technology Management, Financial Management and Cost Accounting.

Distance Learning Mediator

2020

IFNMG – Federal Institute of Northern Minas Gerais

Online mediation for the Mobile Device Programmer course.

On-site Course Mediator

2017 – 2019

IFNMG – Federal Institute of Northern Minas Gerais

On-site mediation in technical and undergraduate programs.

Agricultural Defense Management Assistant

Nov 2005 – Present

Instituto Mineiro de Agropecuária (IMA)

Member of the Innovation and Modernization Unit (NIM/IMA), working on projects, IT support, management and modernization of institutional processes.

Mathematics Teacher

2010

Escola Municipal D. Vila Pinto

Mathematics for middle school students.

Electronics Maintenance Technician

2005

São Francisco City Hall, MG

Electronic maintenance of municipal equipment.

Education

- Ph.D. candidate in Computational Modeling – CEFET/MG
- M.Sc. in Computational Modeling and Systems – UNIMONTES
- B.Eng. in Computer Engineering – UNIMONTES
- B.Ed. in Mathematics (Teaching Degree) – UNIMONTES

Selected Projects

- Dashboards and automation in Python and Node.js
- APIs with Django / Django Ninja and Spring Boot
- Front-ends with React and TypeScript
- Mobile prototypes with React Native

Soft Skills

Leadership and mentoring • Adaptability • Communication • Problem solving

Languages

- Portuguese – Native
- English – Intermediate (technical reading and documentation)
- Spanish – Basic
